BLUEFISH444 ANNOUNCES COMPATIBILITY WITH TOUCHDESIGNER
3D Graphics over SDI for Live Production, Projection Mapping and High Performance Video Playback

Melbourne, Australia, August 9, 2016 — Bluefish444 today announced that the Epoch | Neutron range, Epoch | 4K Supernova S+ range, and Epoch | Supernova CG video I/O cards for developers are now supported by Derivative's TouchDesigner software.

TouchDesigner is a real-time visual development platform that equips professionals with the tools that they need to create stunning projects and rich user experiences. TouchDesigner combined with Bluefish444 allows the creation of interactive media systems, architectural projections, live music visuals, real-time on-set compositing, or rapid-prototyping with professional SDI support.

"Bluefish444 cards were the right solution for one of our largest TouchDesigner-driven permanent installations," said Matthew Ragan, Interactive Engineer at Obscura Digital. "Having a reliable, high fidelity capture solution was an imperative part of this arena, and Bluefish444 provided the right tool for the job."

The Epoch | 4K Supernova S+ range and Epoch | Supernova CG are multi-channel 3G/HD/SD SDI I/O video cards enabling TouchDesigner customers to choose between a number of configurable I/O combinations. The Epoch | Neutron range offers both full height and low profile form factor variants, in either multi-channel 3G/HD or HD/SD with HDMI preview, providing a wide range of server integration alternatives.

"TouchDesigner is a pre-eminent tool for creatives working in cutting edge workflows such as projection mapping and live production," said Craige Mott, Managing Director of Bluefish444. "Our highest quality SDI I/O, proven reliability and stability are the perfect fit for the demanding real-time workflows supported by TouchDesigner."

About Derivative

Derivative was founded in the pursuit of composing visuals for live music events. As TouchDesigner has evolved, so too has its capabilities in a range of real-time environments, and the software has helped to create dazzling experiences the world over. From direct syncing with Ableton Live, to full MIDI and OSC support, to doubling as a lighting control desk using DMX and Art-Net, TouchDesigner is more than capable for any live performance.
